DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 1-12, drawn to a catalyst, classified in class 502, subclasses 34 and 35 (502/34,35).

Group II. Claim 13-30, drawn to a process of preparing chloroform and chlorinated paraffins classified in class 570, subclass 261 (570/261).

The inventions of Group I and Group II are independent and distinct because there is no patentable co-action between them and a reference anticipating one member will not render the other obvious.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that a reply to this requirement must include an identification of the invention that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

A telephone call was made to Mr. Steve Davis on 02/08/05 to request an oral election to the above restriction requirement, but did not result in an election being made.
